DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 2, 2003 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 15 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not describe *support* of the flat plate-shaped base plate **6** by any portion of the top region. Instead, placement of the flat plate-shaped base plate **6** into the fitting member **7** along its bottom region supports element **6** vertically.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites the limitation “the recording photo-conductive layer and the reading photo-conductive layer” in lines 1-2. There is insufficient antecedent basis for this limitation in the claim. No photo-conductive layers, regardless of type, are established by claims 1 or 13.

Allowable Subject Matter

6. Claims 1-6, 9-13, and 16 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: although it would not be a reasonable proposition that the imaging member of Fender *et al.* is supported against Earth's gravity above laser 5 and mirror 6 by free space, nevertheless, a “case housing” of the type recited in sole independent claim 1 is not shown; although it would not be credible that glass plate 21 of Tonami *et al.* is not “fixed” to the vacuum tube 11, nevertheless, a “case housing” of the type recited is not suggested.

Response to Submission(s)

8. The amendment filed September 2, 2003 has been entered.

9. The advisory action mailed July 16, 2003 plainly states that the proposed amendment submitted July 2, 2003 will be entered “For purposes of Appeal...” Since there has not been an appeal under 37 CFR 1.191(a) of any rejection in this application, it is not clear on what basis applicant's representative should have formed the belief that the amendment to claim 9 had been entered. In view of the current treatment of amendments under 37 CFR 1.121 the issue is moot as the cancellation of claims 7 and 8 and the amendment of claim 9 is accomplished by the listing of claims submitted September 2, 2003.

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Constantine Hannaher whose telephone number is (703) 308-4850. The examiner can normally be reached on Monday-Friday with flexible hours.
